WORK EXPERIENCE

Front-End-Developer

Techriffs Info Systems   2022-2024

- Developed and maintained user interfaces using React components to ensure high performance and scalability.
- Implemented state management with Redux to manage application data flow and ensure consistency across components.
- Designed and styled user interfaces using HTML and CSS to create visually appealing and user-friendly web applications.
- Utilized Bootstrap framework to streamline the development process and ensure compatibility across different devices and browsers.
- Integrated third-party APIs such as RESTful APIs to fetch and manipulate data from external sources within the application.
- Collaborated with backend developers to define API requirements and ensure seamless integration between frontend and backend systems.
- Utilized Git for version control, including branching, merging, and resolving conflicts to manage project codebase efficiently.
- Maecenas sed nulla eget velit tristique pharetra. Praesent a scelerisque orci.
- Implemented JavaScript best practices and design patterns to write clean, modular, and maintainable code for frontend development.

PROJECTS

Project-1 — (Technologies - React, Redux-toolkit, React-Router) Played a key role in crafting an efficient apartment maintenance application. Specifically focused on creating features like managing visitor data and functionalities to handle payroll.

Project-2 — (Technologies - React, Redux-toolkit, React-Router) Contributed to the development of a loan application system for a prestigious bank. Took charge of building essential features related to loan summaries, approval processes, and post-approval follow-ups.
